## Project Overview

---

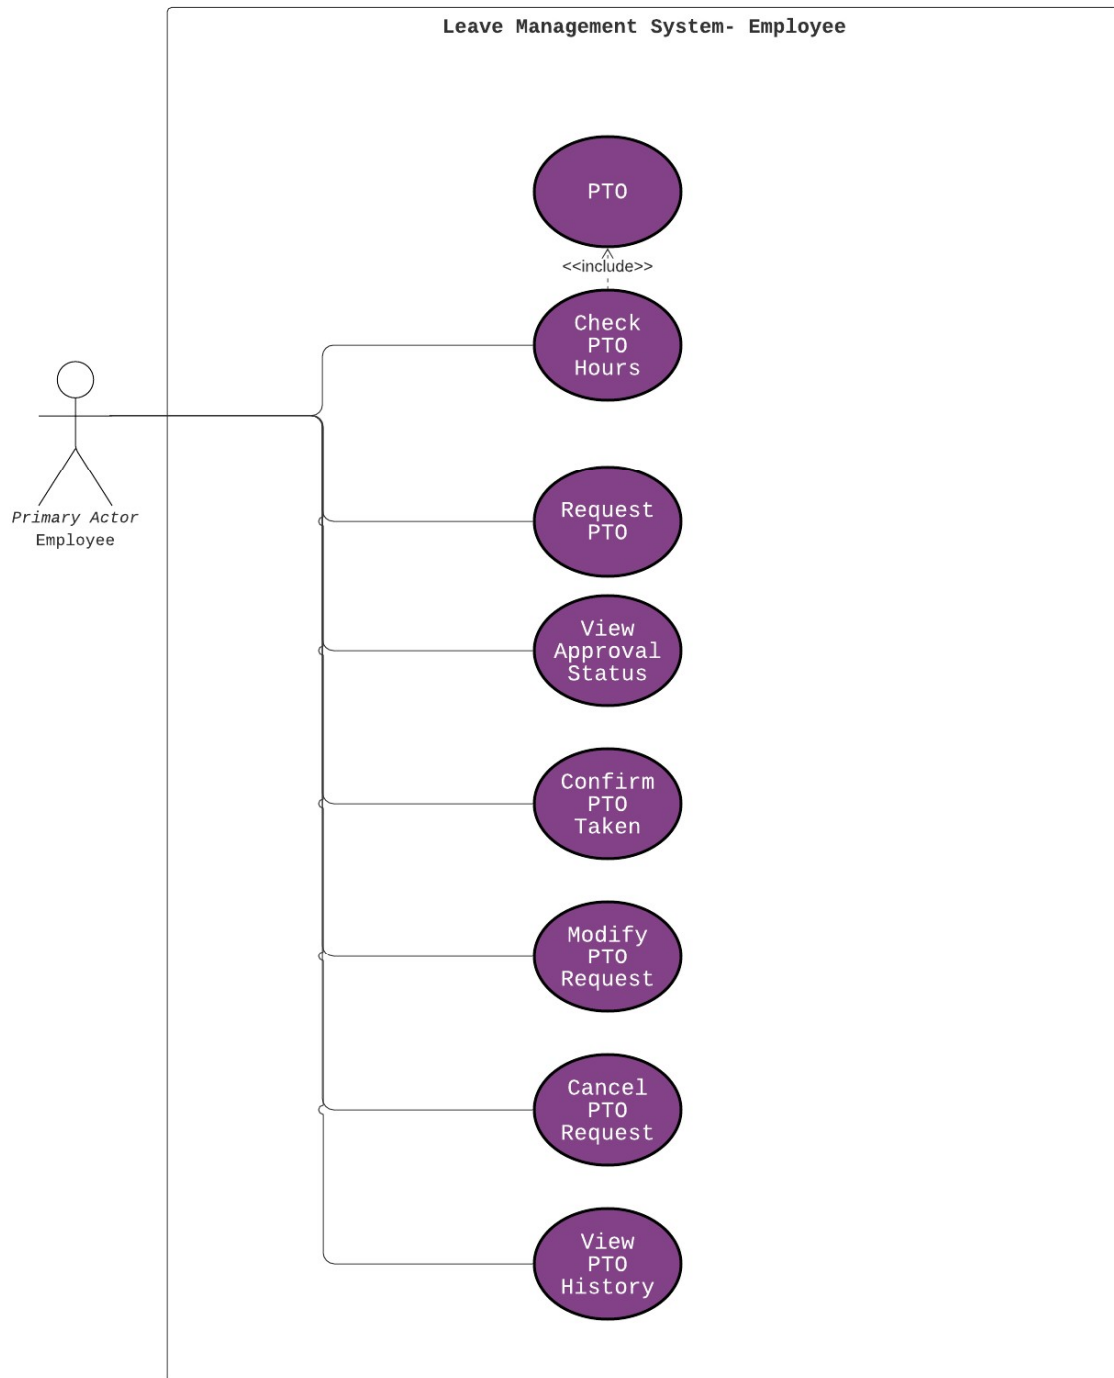

Ben and Billie Muzzy developed a Leave Management System (LMS). An LMS is an all-in-one platform that handles all time off requests from employees. Time off request types included in this LMS will be: Paid Time Off (PTO), Unpaid Time Off (UTO), and Bereavement.

Employees will be able to check available PTO hours, request to use PTO hours, view approval status, modify PTO requests, cancel PTO requests, and view PTO history.

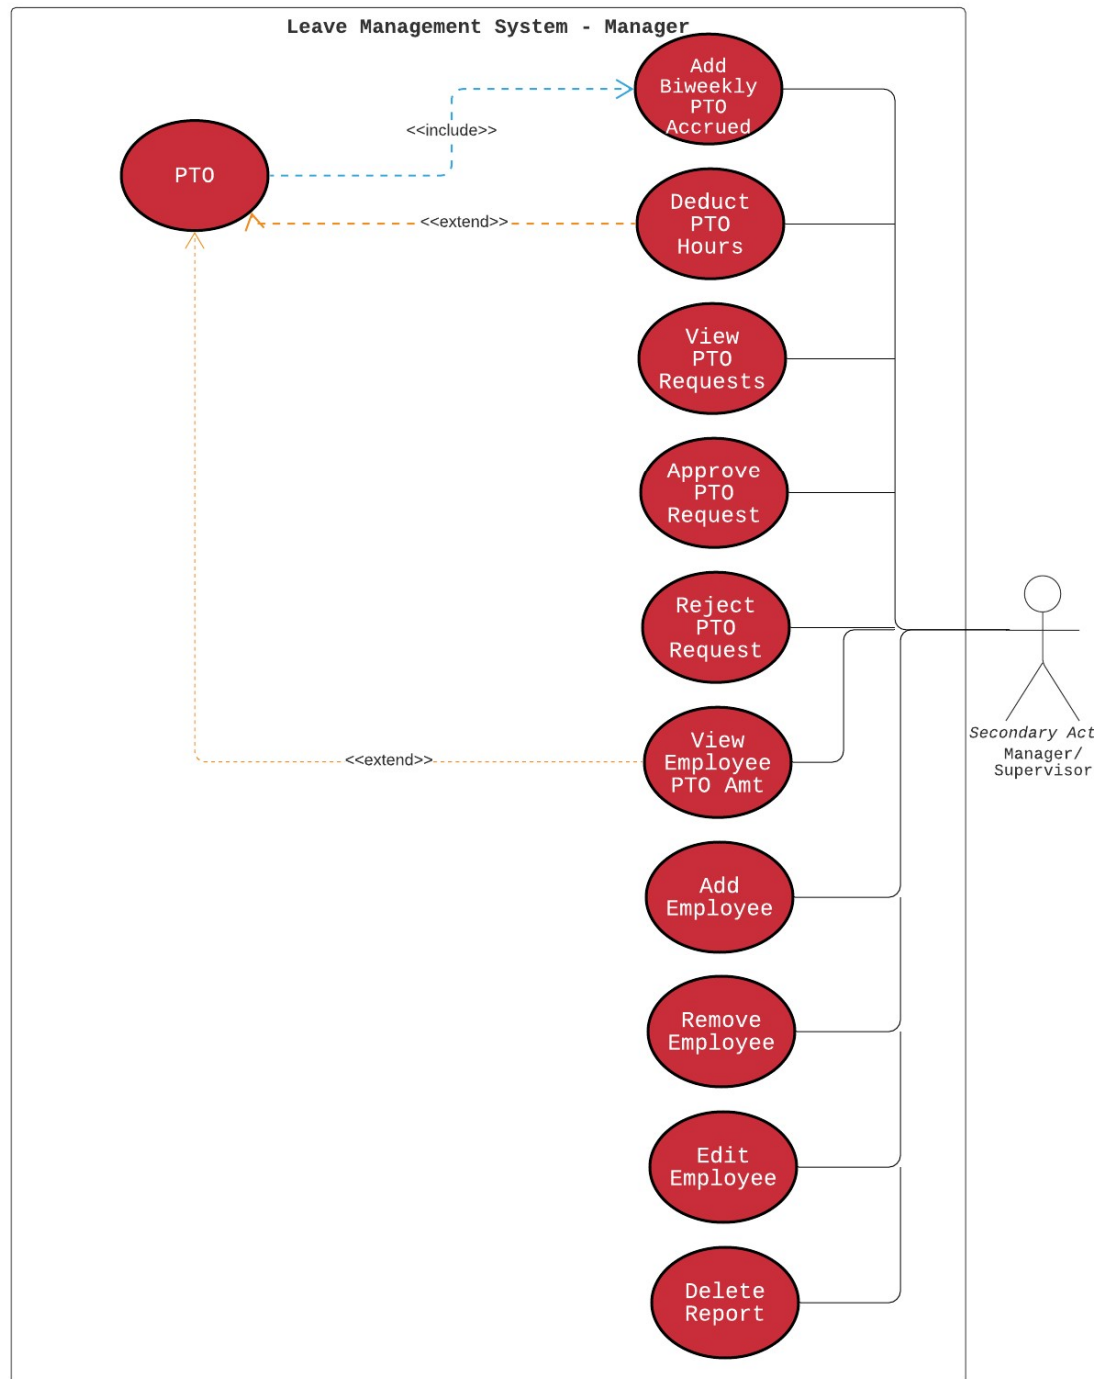

Manager/Supervisors will be able to view PTO requests, approve PTO requests, reject PTO requests, and view an employee's available PTO.

# Use Cases

## Employee

## Manager

## Use Case Elaborations

<i>Use Case Name</i>	Check PTO Hours
<i>ID</i>	UC1
<i>Scenario</i>	Employee Checks Hours
<i>Triggering Event</i>	Employee considering taking time off
<i>Brief Description</i>	Employee thinking about taking a mental health day. First time using system.
<i>Actors</i>	Employee, Manager
<i>Assumptions</i>	Full time employee eligible for PTO
<i>Frequency of Use</i>	As needed
<i>Related Use Cases</i>	PTO, Add Biweekly PTO Accrued, Deduct PTO Hours
<i>Stakeholders</i>	Manager
<i>Preconditions</i>	Does not know how much PTO available
<i>Postconditions</i>	Now knows PTO available
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1.) Employee logs on to portal</li> <li>2.) Employee selects the view PTO hours buttons</li> <li>3.) System responds with total PTO available <ol style="list-style-type: none"> <li>a. User has enough PTO and proceeds to Request PTO</li> <li>b. User does not have enough PTO and logs off</li> </ol> </li> </ol>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1.) User receives login error</li> <li>2.) Employee reaches out to Manager</li> <li>3.) Manager adds employee to portal</li> <li>4.) Employee follows Main Course</li> </ol>

Use Case Name	Request PTO
ID	UC02
Scenario	Employee wants to request PTO
Triggering Event	Employee see they have enough hours to take PTO.
Brief Description	Employee sees they have enough PTO hours and wants to take a mental health day.
Actors	Employee, Manager
Assumptions	Full time employee eligible for PTO
Frequency of Use	As needed
Related Use Cases	Check PTO Hours
Stakeholders	Manager
Preconditions	Employee wants to take PTO
Postconditions	Employee requested PTO
Main Course	<ol style="list-style-type: none"> <li>1.) Employee logs on to portal</li> <li>2.) Employee selects the view PTO hours buttons</li> <li>3.) System responds with total PTO available <ol style="list-style-type: none"> <li>a. User has enough PTO and proceeds to Request PTO</li> </ol> </li> <li>4.) Employee requests PTO</li> <li>5.) Request forwarded to Manager for approval</li> <li>6.) Employee logs out of system</li> <li>7.) Employee waits for email notification that approval status is available</li> </ol>
Alternate Course	<ol style="list-style-type: none"> <li>1.) Employee logs on to portal</li> <li>2.) Employee selects the view PTO hours buttons</li> <li>3.) System responds with total PTO available <ol style="list-style-type: none"> <li>a. User has enough PTO and proceeds to Request PTO</li> </ol> </li> <li>4.) Employee requests PTO</li> <li>5.) Error Message received when requesting that there was not enough PTO available</li> <li>6.) Manager reaches out to developer</li> <li>7.) Developer corrects bug</li> <li>8.) Employee follows Main Course</li> </ol>

<i>Use Case Name</i>	View PTO Requests
<i>ID</i>	UC03
<i>Scenario</i>	Manger views PTO requests
<i>Triggering Event</i>	Notification that an employee requested PTO
<i>Brief Description</i>	Employee requested PTO, email notification that there is a PTO request available was emailed to manager.
<i>Actors</i>	Manager, Employee
<i>Assumptions</i>	Manager has access to employee's schedules
<i>Frequency of Use</i>	Daily
<i>Related Use Cases</i>	Request PTO
<i>Stakeholders</i>	Employee
<i>Preconditions</i>	Request pending for approval
<i>Postconditions</i>	Request approved or rejected
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1. Notification received that there is a new PTO request available.</li> <li>2. Manger logs into portal</li> <li>3. Manager checks staff schedule to ensure that there is enough coverage for the day <ol style="list-style-type: none"> <li>a. Coverage is sufficient and Manager approves</li> <li>b. Coverage is not sufficient, and Manager rejects</li> </ol> </li> <li>4. Notification sent to employee</li> <li>5. Manager logs off</li> </ol>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1. Employee has waited 24 hours for approval and has not received approval</li> <li>2. Employee reaches out to Manager to ask status</li> <li>3. Manager did not see notification</li> <li>4. Manager checks for spam messages <ol style="list-style-type: none"> <li>a. Message is in Spam, manager unblocks address</li> <li>b. Message is not in Spam manager reaches out to Developer</li> </ol> </li> <li>5. Manager follows main course steps 2-5</li> </ol>

<i>Use Case Name</i>	View approval status
<i>ID</i>	UC04
<i>Scenario</i>	Employee email notification that approval status is available
<i>Triggering Event</i>	Manager approved PTO request
<i>Brief Description</i>	Employee submitted for PTO and manager approved/rejected request. Employee received notification that approval status available
<i>Actors</i>	Employee, Supervisor
<i>Assumptions</i>	Employee Requested PTO
<i>Frequency of Use</i>	As needed
<i>Related Use Cases</i>	Approve PTO Request, Reject PTO Request
<i>Stakeholders</i>	Manager
<i>Preconditions</i>	<ol style="list-style-type: none"> <li>1.) PTO has been approved or reject</li> <li>2.) Employee received notification approval status available</li> </ol>
<i>Postconditions</i>	Employee knows if PTO has been approved or rejected
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1.) Employee receives notification that PTO status is available</li> <li>2.) Employee logs into portal</li> <li>3.) Employee clicks on link to view status <ol style="list-style-type: none"> <li>a. Approved</li> <li>b. Rejected – if rejected reason provided such as “not enough coverage”</li> </ol> </li> <li>4.) Employee logs out of portal</li> </ol>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1.) Employee receives notification that PTO status is available</li> <li>2.) Employee logs into portal</li> <li>3.) Employee clicks on link to view status</li> <li>4.) Status was rejected, but no reason provided because Manager did not enter a reason.</li> <li>5.) Employee consults with Manager as to why rejected</li> <li>6.) Manager tells employee reason</li> <li>7.) Manager updates portal with reason code</li> <li>8.) Manager selects option to not send out a notification</li> <li>9.) Manager logs off</li> </ol>

<i>Use Case Name</i>	Cancel PTO Request
<i>ID</i>	UC05
<i>Scenario</i>	Employee wants to cancel PTO request.
<i>Triggering Event</i>	Employee remembers they requested PTO for a day they no longer need.
<i>Brief Description</i>	Employee's family no longer coming for a visit and realized they need to cancel their PTO request.
<i>Actors</i>	Employee
<i>Assumptions</i>	Previously requested PTO amount hasn't already been deducted from available PTO.
<i>Frequency of Use</i>	Whenever needed.
<i>Related Use Cases</i>	Request PTO, Modify, PTO Request, View PTO Request History
<i>Stakeholders</i>	Employee, supervisor
<i>Preconditions</i>	Employee wants to cancel a PTO Request
<i>Postconditions</i>	Employee has cancelled a PTO Request
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1. Employee logs into LMS.</li> <li>2. Clicks "View PTO Request History" and sees his current PTO request still listed as approved.</li> <li>3. Employee selects the PTO request and clicks cancel.</li> <li>4. Employee's requested PTO gets added back to their available PTO balance.</li> </ol> <p>Supervisor gets notification of the cancellation request but needs to take no action on it as PTO cancellations do not need supervisor approval.</p>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1. Employee logs into LMS.</li> <li>2. Clicks "View PTO Request History" and sees his current PTO request still listed as approved.</li> <li>3. Employee selects the PTO request and clicks cancel.</li> <li>4. Employee receives error, "UNABLE TO CANCEL PTO REQUEST".</li> </ol> <p>Employee contacts his supervisor about the error. Supervisor views the PTO request again and sees it's for tomorrow's date. Reminds employee that PTO cancellation requests must be submitted 36 hours prior to date of the PTO Request.</p>

Use Case Name	Modify PTO Request
ID	UC06
Scenario	Employee wants to modify a PTO request
Triggering Event	Employee wanted to adjust his PTO request from 4 hours to 8 hours
Brief Description	Employee got a call their doctor, based on test results just received the doctor would like to run additional tests at the Employee's next appointment. Employee then realizes they will need to take additional hours PTO for that appointment.
Actors	Employee, supervisor
Assumptions	Employee has enough available PTO.
Frequency of Use	Whenever needed.
Related Use Cases	Check available PTO, Request PTO, Cancel PTO Request
Stakeholders	Employee, supervisor
Preconditions	Employee needed modify the number of hours on a PTO Request
Postconditions	Employee successfully modified the number of hours on a PTO Request
Main Course	<ol style="list-style-type: none"> <li>1. Employee logs into LMS.</li> <li>2. Clicks "View PTO Request History" and finds the PTO Request to modify</li> <li>3. Employee selects the PTO request and clicks modify and enters the new PTO amount and clicks submit.</li> <li>4. Supervisor gets notification of the PTO Request Modification and approves the change. Employee gets email notification that the PTO change has been approved.</li> </ol>
Alternate Course	<ol style="list-style-type: none"> <li>1. Employee logs into LMS.</li> <li>2. Clicks "View PTO Request History" and finds the PTO Request to modify</li> <li>3. Employee selects the PTO request and clicks modify and enters the new PTO amount and clicks submit.</li> <li>4. Supervisor gets notification of the PTO Request Modification and clicks approve on the request, but receives error, "Request previously approved, unable to approve again".</li> <li>5. Supervisor contacts Dev Team about the issue.</li> <li>6. Dev Team deploys fix to allow modification of previously submitted PTO Requests.</li> <li>7. Supervisor tries to approve the request again this time it was successful.</li> </ol>

<i>Use Case Name</i>	Deduct PTO Hours
<i>ID</i>	UC07
<i>Scenario</i>	Employee wants view if the PTO they took 2 week ago was deducted from their available PTO
<i>Triggering Event</i>	Employee wants view if the PTO they took 2 week ago was deducted from their available PTO
<i>Brief Description</i>	Employee wants view if the PTO they took 2 week ago was deducted from their available PTO
<i>Actors</i>	Employee
<i>Assumptions</i>	Employee had used PTO
<i>Frequency of Use</i>	Whenever needed.
<i>Related Use Cases</i>	Request PTO, Cancel PTO Request, Approve PTO Request, Reject PTO Request
<i>Stakeholders</i>	Employee, Supervisor
<i>Preconditions</i>	Employee wants to see if the PTO they recently used was deducted
<i>Postconditions</i>	Employee was able to verify the PTO they used recently was deducted from their available PTO amount
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1. Employee logs into LMS.</li> <li>2. Clicks "Available PTO" and see they have 16 hours of PTO when previously they had 24 hours, so the PTO was deducted.</li> </ol>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1. Employee logs into LMS.</li> <li>2. Clicks "Available PTO" and sees they still have 24 hours of available PTO.</li> <li>3. Employee contacts their Supervisor about the issue</li> <li>4. Supervisor contacts Dev Team about the issue</li> <li>5. Dev Team looks into the issue and sees the approval status in the system, but the PTO was never deducted. Dev Team looks into the issue and finds that the time and date was off on the LMS Server which prevented the "Deduct PTO Hours" service from running.</li> <li>6. Dev Team applies fix to the LMS application to use a different source for correct date and time.</li> </ol> <p>Supervisor asks Employee to check their available PTO again. Employee checks and sees the correct available PTO amount.</p>

<i>Use Case Name</i>	Confirm PTO Taken
<i>ID</i>	UC08
<i>Scenario</i>	Employee used PTO recently and wants to confirm it was deducted from their available PTO
<i>Triggering Event</i>	Employee wants to confirm the PTO they used got deducted correctly from their available PTO amount
<i>Brief Description</i>	Employee used PTO recently and wants to confirm it was deducted from their available PTO
<i>Actors</i>	Employee
<i>Assumptions</i>	That the previous PTO Request was approved and not denied
<i>Frequency of Use</i>	Whenever needed
<i>Related Use Cases</i>	Request PTO, Approve PTO Request
<i>Stakeholders</i>	Employee
<i>Preconditions</i>	Employee used PTO and wants to confirm it was deducted from their available PTO.
<i>Postconditions</i>	Employee was able to confirm their PTO Request was deducted correctly.
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1. Employee logs into LMS.</li> <li>2. Clicks "available PTO"</li> <li>3. Employee sees that they have the correct available PTO amount.</li> </ol>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1. Employee logs into LMS.</li> <li>2. Clicks "Available PTO" 16 hours of PTO were taken when it should have only been 8.</li> <li>3. Employee contacts their Supervisor about the issue.</li> <li>4. Supervisor contacts Dev Team about the issue.</li> <li>5. Dev Team sees that the PTO Request had been originally submitted for 16 hours and then later modified to 8 hours.</li> <li>6. Dev Team applies fix for when PTO Requests are modified the original request is removed.</li> </ol> <p>Supervisor asks Employee to check their available PTO again and now the correct amount shows.</p>

<i>Use Case Name</i>	View PTO History
<i>ID</i>	UC09
<i>Scenario</i>	Employee sees they only have 16 hours of PTO available and they thought they had more, so they go to View PTO History
<i>Triggering Event</i>	Employee shows less available PTO then they thought they had
<i>Brief Description</i>	Employee sees they only have 16 hours of PTO available and they thought they had more, so they go to View PTO History
<i>Actors</i>	Employee
<i>Assumptions</i>	That the Employee previously has submitted a PTO request and their Supervisor approved it
<i>Frequency of Use</i>	Whenever needed
<i>Related Use Cases</i>	Check PTO Hours, Request PTO, Modify PTO Request, Cancel PTO Request
<i>Stakeholders</i>	Employee, Supervisor
<i>Preconditions</i>	Employee wants to verify if they used PTO or not
<i>Postconditions</i>	Employee is able to verify they did indeed use more PTO than they thought
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1. Employee logs into LMS.</li> <li>2. Clicks "View PTO History"</li> <li>3. Employee is able to see that they did use more PTO than they thought and the available PTO amount is correct.</li> </ol>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1. Employee logs into LMS.</li> <li>2. Clicks "View PTO History"</li> <li>3. Employee is able to see that they have an extra PTO Request they don't remember submitting.</li> <li>4. Employee contacts their Supervisor about the issue</li> <li>5. Supervisor contacts Dev Team about the reported issue</li> <li>6. Dev Team looks into the issue and finds that the recent company holiday got applied as regular PTO use for all employees</li> <li>7. Dev Team applies fix, so company holidays do not trigger PTO use</li> <li>8. Supervisor contacts Employee and asks them to verify their available PTO amount</li> <li>9. Employee is now able to see the correct available PTO is showing</li> </ol>

<i>Use Case Name</i>	Approve PTO Request
<i>ID</i>	UC10
<i>Scenario</i>	Supervisor needs to approve a PTO request
<i>Triggering Event</i>	Supervisor received a PTO Request notification
<i>Brief Description</i>	An employee on the Supervisor's team submitted a PTO Request
<i>Actors</i>	Employee, Supervisor
<i>Assumptions</i>	Employee actually submitted a PTO Request
<i>Frequency of Use</i>	Whenever needed
<i>Related Use Cases</i>	Reject PTO Request, View Employee Amt
<i>Stakeholders</i>	Employee, Supervisor
<i>Preconditions</i>	Supervisor logs into LMS and approves the PTO Request
<i>Postconditions</i>	Supervisor approved PTO request and Employee receives PTO approved notification
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1. Supervisor logs into LMS.</li> <li>2. Supervisor clicks "View PTO Requests"</li> <li>3. Supervisor clicks "Approve PTO" and the PTO Request gets and approved note added and a notification is sent to the Employee</li> </ol>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1. Supervisor logs into LMS.</li> <li>2. Supervisor clicks "View PTO Requests"</li> <li>3. Supervisor clicks "Approve PTO" and nothing happens</li> <li>4. Supervisor contacts Dev Team about the issue</li> <li>5. Dev Team looks into the reported issue and doesn't find any application or system issues.</li> <li>6. Dev Team asks Supervisor to reboot their PC and try again.</li> <li>7. Supervisor reboots and tries the approval again and time it goes through</li> </ol>

<i>Use Case Name</i>	View PTO Requests
<i>ID</i>	UC11
<i>Scenario</i>	Manager/Supervisor needs to view PTO requests
<i>Triggering Event</i>	Manager/Supervisor gets a notification via email that there are new PTO requests pending
<i>Brief Description</i>	Manager/Supervisor gets an alert that there are PTO requests that need approval.
<i>Actors</i>	Manager
<i>Assumptions</i>	PTO requests pending
<i>Frequency of Use</i>	daily
<i>Related Use Cases</i>	Add PTO Request
<i>Stakeholders</i>	Employee
<i>Preconditions</i>	Receives notification that there is a PTO request
<i>Postconditions</i>	PTO request approved or rejected
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1.) Employee submits request for PTO</li> <li>2.) Manager receives notification that there is a PTO request pending</li> <li>3.) Manager goes to Portal and approves/rejects</li> </ol>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1.) Employee submits request for PTO</li> <li>2.) Manager does not get notification</li> <li>3.) Employee waits for status. After 24 hours asks manager for status</li> <li>4.) Manager checks portal request is there, but no notification</li> <li>5.) Manager approves request</li> <li>6.) Manager notifies developer</li> </ol>

Use Case Name	Reject PTO Request
ID	UC12
Scenario	Manager rejects PTO request
Triggering Event	Manager receives notification that there is a PTO request
Brief Description	After receiving notification manager sees that there are already too many people taking time off.
Actors	Employee, Manager
Assumptions	PTO request submitted
Frequency of Use	Monthly
Related Use Cases	Add PTO request
Stakeholders	Employee, Manager
Preconditions	PTO Requested
Postconditions	PTO rejected
Main Course	<ol style="list-style-type: none"> <li>1.) Employee submits request for PTO</li> <li>2.) Manager gets notification</li> <li>3.) Manager checks calendar and sees multiple employees already have the day off</li> <li>4.) Manager rejects PTO and receives success message</li> </ol>
Alternate Course	<ol style="list-style-type: none"> <li>1.) Employee submits request for PTO</li> <li>2.) Manager gets notification</li> <li>3.) Manager checks calendar and sees multiple employees already have the day off</li> <li>4.) Manager clicks on reject PTO option, but the page is spinning.</li> <li>5.) Manager notifies employee in person that PTO request is denied and provides reason.</li> <li>6.) Manager notifies development</li> </ol>

Use Case Name	View Employee PTO Amount
ID	UC13
Scenario	Manager checks to see if employee has enough PTO
Triggering Event	PTO request
Brief Description	Employee has been taking a lot of PTO recently and Manager suspects that employee does not have enough PTO.
Actors	Manager, Employee
Assumptions	A PTO request is submitted, and employee qualifies for PTO
Frequency of Use	Weekly
Related Use Cases	Request PTO
Stakeholders	Manager
Preconditions	Employee requests PTO
Postconditions	Manager views hours
Main Course	<ol style="list-style-type: none"> <li>1.) Employee submits request for PTO</li> <li>2.) Manager gets notification</li> <li>3.) Manger checks PTO hours and confirms suspicion.</li> </ol>
Alternate Course	<ol style="list-style-type: none"> <li>1.) Employee submits request for PTO</li> <li>2.) Manager gets notification</li> <li>3.) Manger checks PTO hours but there is an excessive amount of PTO available</li> <li>4.) Manager confirms PTO with payroll and confirms there is an error</li> <li>5.) Manager reports error.</li> </ol>

<i>Use Case Name</i>	Add New Employee
<i>ID</i>	UC14
<i>Scenario</i>	Manager needs to add a new hire to portal
<i>Triggering Event</i>	New hire qualifies for PTO
<i>Brief Description</i>	New hire qualifies for PTO and manager needs to add to portal
<i>Actors</i>	Manager
<i>Assumptions</i>	New hire qualifies for PTO
<i>Frequency of Use</i>	Monthly
<i>Related Use Cases</i>	NA
<i>Stakeholders</i>	Manager, Employee
<i>Preconditions</i>	Employee qualifies for PTO
<i>Postconditions</i>	Employee can use portal
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1.) Employee qualifies for PTO</li> <li>2.) Manager creates new user for employee</li> <li>3.) Employee confirms can log in</li> </ol>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1.) Employee qualifies for PTO</li> <li>2.) Manager creates new user for employee</li> <li>3.) Employee unable to login</li> <li>4.) Manager checks Portal and sees that they did not enter all required information</li> <li>5.) Manager completes information</li> <li>6.) Employee can login</li> </ol>

<i>Use Case Name</i>	Remove Employee
<i>ID</i>	UC15
<i>Scenario</i>	Employee terminated and needs to be removed from portal
<i>Triggering Event</i>	Employee terminated
<i>Brief Description</i>	Employee terminated and needs to be removed from portal
<i>Actors</i>	Manager
<i>Assumptions</i>	Employee qualified for PTO
<i>Frequency of Use</i>	Monthly
<i>Related Use Cases</i>	Add New Employee
<i>Stakeholders</i>	Manager
<i>Preconditions</i>	Employee has access to portal
<i>Postconditions</i>	Employee does not have access to portal
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1.) Employee Terminated</li> <li>2.) Manager clicks remove employee, and confirms</li> <li>3.) Employee is removed from system</li> </ol>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1.) Employee Terminated</li> <li>2.) Manager clicks remove employee, and receives an error to check VPN</li> <li>3.) Manager notices they are not logged into VPN and logs back in.</li> <li>4.) Manager removes employee</li> </ol>

<i>Use Case Name</i>	Edit Employee
<i>ID</i>	UC16
<i>Scenario</i>	An employee gets married and needs a name change
<i>Triggering Event</i>	Employee notifies manager that they need to have their name changed.
<i>Brief Description</i>	Employee needs to be edited because last name changed
<i>Actors</i>	Employee, Manager
<i>Assumptions</i>	Employee has access to portal
<i>Frequency of Use</i>	Few times per year
<i>Related Use Cases</i>	Add Employee
<i>Stakeholders</i>	Employee
<i>Preconditions</i>	Last name needs updating
<i>Postconditions</i>	Last name is correct.
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1.) Employee notifies manager of name change</li> <li>2.) Manager edits the employee name</li> <li>3.) Employee's name is updated</li> </ol>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1.) Employee notifies manager of name change</li> <li>2.) Manager edits the employee name</li> <li>3.) Employee's name is updated</li> <li>4.) Employee checks their portal and name is not correct</li> <li>5.) Employee tries logging out and logging back in and name is corrected</li> </ol>

<i>Use Case Name</i>	Delete Report
<i>ID</i>	UC17
<i>Scenario</i>	Report is no longer needed
<i>Triggering Event</i>	Receives notification that report has not been utilized in 6 months.
<i>Brief Description</i>	Report is no longer needed, and manager wants it removed from dashboard.
<i>Actors</i>	Manager
<i>Assumptions</i>	Report was created by Manager
<i>Frequency of Use</i>	1-2 times a year
<i>Related Use Cases</i>	Add report
<i>Stakeholders</i>	Manager
<i>Preconditions</i>	Report displays in dashboard
<i>Postconditions</i>	Report no longer in dashboard.
<i>Main Course</i>	<ol style="list-style-type: none"> <li>1.) Manager receives notification that report has not been used in six months</li> <li>2.) Manager deletes report</li> <li>3.) Report is no longer in dashboard</li> </ol>
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1.) Manager receives notification that report has not been used in six months</li> <li>2.) Manager deletes report</li> <li>3.) Report is still in dashboard</li> <li>4.) Manger checks with development and learns that they cannot delete the report because they were not the creator of the report.</li> <li>5.) Development removes the report and adds the option for reports to be deleted by anyone in the Manager's role.</li> </ol>

<i>Use Case Name</i>	Add PTO Accrued
<i>ID</i>	UC18
<i>Scenario</i>	PTO is to be added every two weeks
<i>Triggering Event</i>	Payday
<i>Brief Description</i>	Every two weeks employee's get PTO added
<i>Actors</i>	System
<i>Assumptions</i>	Employee qualifies for PTO
<i>Frequency of Use</i>	Biweekly
<i>Related Use Cases</i>	View PTO
<i>Stakeholders</i>	Employee
<i>Preconditions</i>	New hours have not been added
<i>Postconditions</i>	New hours added
<i>Main Course</i>	System auto adds PTO
<i>Alternate Course</i>	<ol style="list-style-type: none"> <li>1.) Employee checks balance and sees no PTO added</li> <li>2.) Employee consults with manager to see why</li> <li>3.) Manager informs employee that they were out on leave for the past two weeks and PTO does not accrue while on leave.</li> </ol>

## Appendix

### Coordination of Work Documentation

<i>Requirement</i>	<i>Primary</i>	<i>Notes</i>
<i>Use Cases</i>	Both	Ben and Billie both did separate use case diagrams in week 4. When comparing original diagrams Billie found that Ben had four unique use cases: <ul style="list-style-type: none"><li>• Modify PTO Requests</li><li>• Cancel PTO Requests</li><li>• View PTO Request History</li><li>• View Employee PTO Amount</li></ul> Billie combined the two use cases diagrams and elaborations.
<i>Rough Sketch of UI</i>	Billie	Billie created rough sketch with feedback from Ben.
<i>Architecture diagram</i>	Ben	Ben created architecture diagram with feedback from Billie.
<i>Class Diagram</i>	Billie	Billie created the class diagram with feedback from Ben.
<i>Sequence Diagram</i>	Ben	Ben created the sequence diagram with feedback from Billie.

## Coordination of Work Python Application

	<i>Class</i>	<i>Primary</i>	<i>Files</i>
	<i>Role</i>	Billie	Roles.py, Leave.db, driver.py
	<i>Permission</i>	Billie	Permissions.py, Leave.db, driver.py
	<i>User</i>	Billie	Users.py, Leave.db, driver.py
	<i>NotificationSubscriber</i>	Billie	Notifications.py, driver.py
	<i>NotificationPublisher</i>	Billie	Notifications.py, driver.py
	<i>LeaveRequest</i>	Ben	LeaveRequest.py, driver.py
	<i>PaidTimeOff</i>	Ben	LeaveRequest.py, driver.py
	<i>UnpaidTimeOff</i>	Ben	LeaveRequest.py, driver.py
	<i>SickDays</i>	Ben	LeaveRequest.py, driver.py
	<i>Bereavement</i>	Ben	LeaveRequest.py, driver.py
